

JustLanded for WordPress

Custom Forms with JustLanded and Contact Form 7

If you need any assistance, please contact support@shapingrain.com. We do provide free support for all our products, but as per our support policy, we do not provide support through the comments section on themeforest.

Download and install Contact Form 7 and compatible plug-ins

Contact Form 7 is a free plug-in which you can download and install from: <http://wordpress.org/plugins/contact-form-7/>

You can also search for “Contact Form 7” from within WordPress to install it that way.

If you would like to maintain a basic contact list/ mailing list, you can furthermore download Flamingo: <http://wordpress.org/plugins/flamingo/>

If you want to integrate Contact Form 7 with MailChimp, have a look at <http://wordpress.org/plugins/contact-form-7-autoresponder-addon-plugin/>

A premium version of that plug-in also integrates GetResponse and AWeber:

<http://wpsolutions-hq.com/premium-cf7-autoresponder-addon/>

Please note that all of these are third party products for which we can only provide limited support. Before contacting ShapingRain.com support for questions related to any of these products, please study the authors' documentation. We do not provide support for third party premium plug-ins.

Create forms in Contact Form 7

In order to use your forms anywhere you first need to create them. Once Contact Form 7 is installed, you will find a new tab “Contact” in your admin panel. This leads you to the Contact Form 7 interface, and from there you can create forms using the code generator.

WordPress toolbar: JustLanded, 4, + New, Debug, Developer, Howdy, marcus

Contact Form 7 [Add New](#)

Contact form 1

[Duplicate](#) | [Delete](#)

Copy this code and paste it into your post, page or text widget content.

```
[contact-form-7 id="142" title="Contact form 1"]
```

[Save](#)

Form

<h2>Order your free copy of this amazing ebook today!</h2>

<p>Your Name (required)
[text* your-name] </p>

<p>Your Email (required)
[email* your-email] </p>

<p>[submit "Get your copy NOW"]</p>

[Generate Tag](#)

Tutorials are available at <http://contactform7.com/docs/>

Use custom forms in your banner

In order to use any custom form created with Contact Form 7, you only need to place the form's shortcode into one of the custom content fields provided by JustLanded for

WordPress for the banner section.

If you want the form to go along **with an image, an image slider or a video clip**, you paste the code into the Custom Text Content field under Banner → Text Content → Custom Text Content → Custom Content:

Custom Text Content

Use your own, custom content for the banner's text section.

Custom Content

[contact-form-7 id="142" title="Contact form 1"]

Enter your custom mark-up here.

Custom Content from Page

----- Please select an option -----

Select a page if you would like to display the contents of a WordPress page instead.

If you want the form to go along with just the 'text content' section and you do not need an image, image slider or video clip, please paste your form shortcode into Banner → Media Content → Video and Free Form Media Content → Free Form Media Content instead.

Free Form Media Content

[contact-form-7 id="142" title="Contact form 1"]

Paste any HTML here. This field will be parsed for shortcodes as well. You may also use this field for more exotic video providers not supported by oEmbed.

...and also instruct the theme to actually use the the Free Form Media Content by selecting “Free Form Content” from Banner → Media Content → Select Media Content:

Media Content

Select Media Content

Single Image

What element would you like to display
as part of the banner's media section?

Use the forms in a modal window

You can use the same form shortcode in modal windows attached to a call to action button. For that, head to Action Buttons → e.g. First Button Modal Window (check) → First Button Modal Window Content and paste your shortcode there.

The same applies in case you wish to your form in any page, in the header, footer etc.

Replicate the demo form on our public demo site

You may also wish to replicate the exact design of the demo form we use on our public demo site.

For that, please copy the following code into your General Settings → Custom Codes → Custom CSS:

```
#banner div.wpcf7 {  
background: rgba(0,0,0,0.5) !important;  
width:90%;  
}
```

```
#banner .wpcf7 textarea {  
width: 100%;  
}
```

```
#banner .wpcf7 .wpcf7-not-valid-tip {  
background: #000;  
}
```

```
#banner .wpcf7 input[type="text"],  
#banner .wpcf7 input[type="url"],  
#banner .wpcf7 input[type="tel"],  
#banner .wpcf7 input[type="number"],
```

```
#banner .wpcf7 input[type="email"] {  
width:100%;  
}
```

And, as always, should you need additional assistance, please contact support@shapingrain.com and please remember that we *never* provide customer support through the comments section on themeforest in order to provide a consistent support experience and to exclude non-licensed users from obtaining free support.
